

Arden Animal Hospital

1823 Fulton Avenue, Sacramento, CA 95825
(916) 485-5412

Dear Clients,

Prior to scheduling dental procedures we will attempt to evaluate the patient's condition as thoroughly as possible and base our cost estimate accordingly. Unfortunately, some abnormalities such as fractured teeth, cervical line lesions, periodontal pockets and abscesses are not readily apparent, especially when covered by a layer of tartar. Dental radiographs and periodontal probing may reveal conditions needing treatment that was not initially anticipated, and incur additional charges. Because of this, we ask that you make your daytime phone number available to us so that we may phone you during the procedure if additional problems have been found.

In the case of additional, non-emergency procedures that become necessary to perform during the course of treatment I would like you to:

_____ Proceed with any treatment deemed necessary including extractions, x-rays, and antibiotics.

_____ Proceed with necessary treatment up to \$_____ additional cost.

_____ Try to phone me first, if you cannot reach me on the telephone you may proceed with any procedures deemed necessary.

_____ Do nothing else unless you reach me by telephone.

Telephone number(s) where I can be reached between 9:00am to 6:00pm today:

Signature: _____
